

Happy Earth Day!!

Earth Day is annually observed on the 22nd of April throughout the world to celebrate and honor mother Earth.

This year St. Xavier's School Bathinda celebrated Earth Day in its own innovative way by creating the vertical garden, by using waste pet bottles as planters by planting easily propagated plants found all around. Students of Classes 4th to 12th participated whole heartedly by planting saplings and also decorated the bottles.

Tree guards were made using eco bricks made of used pet bottles filled tightly with polythene bags and plastic waste.

The 3R's i.e., Reduce, Reuse and Recycle were well implemented during this campaign.

Innovative heads Ms. Jyoti and Ms. Nupur were the brains for this innovative venture.

The idea of creating vertical garden space as Eco Park was launched in the presence of Principal Father Cidloy Furtado, Coordinator Archana Rajput and students.
