

## Field Trip

St. Xavier's students of class 9 were taken to a field trip to the Xavierian Lab for the orientation and visit of the lab. They were told about the various machines and the experts enlighten them about the working of the lab. Students were also taken to the OPD and were told about the centrifugation machine. They were made aware about the use of Electronic Microscope for checking the blood samples, and also about the machine for checking quality of blood samples.

On the top of that Girls were given a special visit to the lab having machines of Sanitary napkins. Girls were told about the making and packing of sanitary pads. Students felt excited and much elated being there and getting an opportunity to learn new things. Refreshment was also given to beat the heat and to bring back the energy.
